STN AnaVist, Version 2.0 allows you to choose from a multitude of visualization and analysis options to view the data that is important to you. With the STN AnaVist 2.0 advantage, your organization can be confident it has made the best business decisions because it has examined the scientific and patent data from all angles!

More content!

STN AnaVist now analyzes database content from Derwent World Patents Index, in addition to CAS, PCT, and USPTO content. Adding Derwent data to your visualizations ensures that you will have the most detailed and comprehensive view possible of your total patent landscape.

More features!

With STN AnaVist, you can

- **Examine your patent landscape from claims text and other points of view.** Visualize the data of interest to you: Title/Abstract, Exemplary/First Claim, all Claims, Technology Indicators (CA index terms), and International Patent Classification (IPC) Codes.
- **Gain a more complete understanding of your landscape through a variety of customized bar charts.** Create bar charts based on any of the following types of data: patent classifications, patent countries, patent country code/kind code, priority application dates/years, publication year trends, Technology Indicators, Derwent Manual Codes and Derwent Class, and your own personalized labeling.
- **Perform comparative analysis with ease.** The enhanced highlighting palette of STN AnaVist allows you to highlight as many as eight different sets of data (such as organizations and their research focus) for easy comparison analysis.
- **Pinpoint the research focus of competitors and customers.** STN AnaVist offers enhanced Landscape presentation options with toggling between 2D and 3D views and new black and white background options that provide a crisper contrast for easier viewing.
