

# New Asian Patent Full-Text Files on STN – CNFULL, KRFULL and JPFULL

## CNFULL (Chinese patent full-text database)

CNFULL contains English language full-text of patent applications, granted patents and utility models published by the State Intellectual Property Office (SIPO) of the People's Republic of China (PRC).

- More than 7 million records and more than 5.5 million images from 1985 onwards
- Bibliographic data including patent applicant and inventor, patent, application, priority, and related (PCT) application data, IPC, CPC, EPC, and ICO classification codes, abstract, and full text of description and claims
- Numeric values of over 30 physical and chemical properties searchable in almost 400 unit variants in all full-text fields
- Machine-translated abstracts, descriptions and claims.
- Database records comprise all documents published for one application
- Clipped images (mostly front-page images) included, when available
- Legal status data and family display formats from the INPADOCDB database
- Searchable online thesauri for the International Patent Classification (/IPC), Cooperative Patent Classification (/CPC), and European Patent Classification (/EPC and /ICO)

## KRFULL (Korean patents full-text database)

KRFULL covers the full text of patent applications, granted patents and utility models published in the Republic of Korea.

- More than 2.7 million records, more than 2.1 million images
- Bibliographic data including patent applicant, inventor, and patent applicant number, patent number, application, priority, and related application data, codes of the International Patent Classification (/IPC), Cooperative Patent Classification (/CPC), abstract and the full text of descriptions and claims
- Available about four weeks after publication date with the complete content
- All text fields available for search and display in English and Korean
- Patent applicant(s), inventor(s) and agent(s) available for search and display in English and Korean
- Machine translated titles, abstracts, descriptions, and claims
- English abstract taken from original text or from equivalent documents
- Weekly updates
- Available on new STN platform only

## JPFULL (Japanese patent full-text database)

JPFULL offers patent full-texts from the Japanese Patent Office (JPO) on STN and thus contributes, together with CNFULL, valuable information from the Asian patent “landscape” to STN’s vast array of patent full-text files.

- More than 4.6 million records from 2004 onwards
- Bibliographic data including patent applicant, inventor, and patent assignee number, patent number, application, priority, and related application data, IPC, CPC, EPC, and ICO classification codes, abstract, and the full text of descriptions and claims
- Numeric values of over 55 physical and chemical properties searchable in almost 1,800 unit variants in all full-text fields
- machine-translated titles, abstracts, descriptions and claims
- Database records comprise all documents published for one application
- Searchable online thesauri for the International Patent Classification (/IPC), Cooperative Patent Classification (/CPC), and European Patent Classification (/EPC and /ICO)
- Legal status data, patent and non-patent citations, and family display formats from the INPADOCDB database
