

## Take advantage from the enhanced Derwent databases on STN

On April 3<sup>rd</sup>, 2022, Derwent World Patents Index<sup>®</sup> will be enriched with exciting new features available only in STNext<sup>®</sup>. Existing search strategies are still valid in the new files, and you can benefit from new capabilities like extended content and crossfile SDIs.

Key changes include:

- Derwent Chemistry Resource<sup>®</sup> (DCR) is now a separate structure database with more powerful structure retrieval capabilities and crossover functionality similar to DWPI/DWPI and CAS REGISTRY<sup>SM</sup> /CAplus<sup>SM</sup>.
- Derwent Patent Citation Index<sup>™</sup> (DPCI) is fully integrated and enriches the scope of search capabilities.
- Claims coverage has been extended for major patent authorities.
- SMARTracker/XFILE SDI – well known from CAS REGISTRY/CAplus - is now available. Results cover new and/or updated bibliographic references that match the structure search profile in DCR.
