

DUPLICATE for identifying or removing duplicate records

Use the DUPLICATE command to identify or remove duplicate answers. DUPLICATE may be used with L-numbers created in single or multiple databases.

To identify duplicates, enter DUP followed by IDE and the L-numbers of answer sets. To remove duplicates, enter DUP followed by REM and the L-numbers of answer sets.

Find patents on acetaldehyde preparation and remove duplicate answers.

1 Perform searches in the appropriate databases. The same profile may be used in all the databases, or it may be individualized to take advantage of database-specific indexing.

2 Enter SET DUPORDER FILE to group answers by database.

3 Enter DUP REM to remove duplicates. The order in which you enter the L-numbers is the order used to retain documents from duplicate sets.

4 Display answers from each database. Duplicates are labeled.

```
=> FILE ENCOMPAT; S ACETALDEHYDE-P/CT
L1          621 ACETALDEHYDE-P/CT

=> FILE CAPLUS; S 75-07-0/PREP AND P/DT
